

Quilled Christmas Lights
Kids Christmas Craft Activity

List of Supplies:

1. Craft paper – white
2. Quilling strips
3. Slotted quilling tool
4. Scissors
5. Craft glue or glue stick

Instructions for making the shape bats:

Step 1:

Take a 20 inches long colored quilling strip and use the slotted quilling tool to coil the entire strip.

Step 2:

Once the coiling is done, take out the coiled strip from the tool and allow it loosen up.

Step 3:

Press any one side of the loose coil to form a teardrop shape and glue the open end to secure the shape.

Step 4:

Take a 3 inches long white colored quilling strip and create a loose coil shape with it.

Step 5:

Press 2 opposite sides of the loose coil to form a lens shape.

Step 6:

Grab the teardrop shape prepared in the previous steps.

Step 7:

Insert the lens shape created in step 5 into the teardrop shape, through the gap of any coils near the curved end; the bulb pattern is ready. Similarly create more bulb patterns.

Step 8:

Now take a 6 inches long black quilling strip and create a small twirl on any of its ends. Use about 2 or 3 cm to create the twirl pattern.

Step 9:

Cut out a white craft paper or cardstock paper for the background, or you can choose any color you want.

Step 10:

Glue the 2 black twirled strips on the paper by creating a slight curvy pattern with them. Glue the 2 strips in 2 rows, keeping at least an inch gap between them.

Step 11:

Take a bulb pattern and glue it on the paper by keeping the curved end adjacent to the black strip (which is the main wire for the bulbs).

Step 12:

One by one add the rest of the bulbs to fill the black strip.

Allow the glue to dry and have fun!
